Mrs. J. P. Lewis and Miss Trezona are
spending a few days at Santa Cruz.

R. K. Thomas is confined to his home
this week with the return of his old ill-
ness.

Miss Mabel Ross left last week for
Honolulu where she will teach the com-
ing year.

The Misses Beaver, of Palo Alto were
renewing acquaintances at Campbell
Sunday.

S. R. Weeks returned Saturday from
Soquel where he has been for the sum-
mer working at his trade as butcher.

Miss Emma Schinackenberg of Saratoga
visited her brother, H. Schnackenberg
and the J. C. Gordon family last week.

The W. C. T. U. will meet in the Col-
lege Club on Wednesday, Sept. 4th at
2:30 o'clock. A full attendance is re-
quested.

Miss Fassett came from San Francisco
and spoke at the M. E. Church Sunday.
She was the guest of Miss Mary Lewis
while here.

Dr. Eastland, wife, mother and niece
of San Francisco were here Sunday and
Monday the guests of Mrs. Lanphear and
son.

Mrs. E. Graf and son, Fred, left today
for a visit with Mrs. Graf's sister, Mrs.
Edw. Frinkle. They will return in time
for Fred to attend school.

Born: To Mr. and Mrs. J. Easton
Carter, a daughter, on August 25th.
The young lady, who weighed 11½
pounds, has been named Margaret.

WANTED: Room and board together, or
board alone. Address, stating terms
and particulars.

I. W. Snow,

Campbell.

Mrs. Miner, who had been the guest
of Mrs. Olmstead, returned to Oakland
Friday. Mrs. Miner is a portrait artist
of repute and expected to go on to New
York to resume her work.

Rev. Atkinson wrote a short story five
years ago entitled "How Jack Signed the
Ship's Articles," and received his pay for
it two years ago, and it has just been
published in the current issue of the
Congregationalist.

Mrs. Sam Thompson and daughter
arrived Friday from Cameron County,
Texas, to visit her parents, Mr. and Mrs.
W. Huntley. Mr. Thompson will come
later and they expect to make their future
home in this State.

The Misses Palmer who have spent
the summer at Mt. Hermon, and Mrs. S.
G. Nelson, who has been with them for
some time returned to Campbell today.
The Misses Palmer intend to return soon
to their former home at Los Angeles.

One of the boarders at the Commercial
hotel attempted to jump his bill and
sneaked away with his "turkey." By
the sprinting of "Doc" Merrill, J. C.
Gordon and E. E. Lanphear the culprit
was rounded up on Dillon Avenue. After
several lying excuses and statements he
was made to pay the bill for himself and
pat. The San Jose police were phoned
as the man is thought to be wanted on an
other charge.

Colored Crepe Tissue and shell papers
at the Press office.

Cecil Kennedy has recovered suffi-
ciently so that he expects to be brought
out home Sunday.

C. J. Ludwig is building a new house
on the property recently purchased by
him on Los Gatos road.

Miss Mary Miller arrived Saturday
from Ashburn, Mo., and will make her
home for a time with her aunt, Mrs. Bull.

Mr. and Mrs. Chas. Sutter went to
Santa Cruz Tuesday for two weeks. Mr.
Sutter has work there on a new resi-
dence purchased by Mr. Schley and Mrs.
Sutter will enjoy an outing in the mean-
time.

Mrs. M. Scholz went to Fresno last
week to visit her son, Oswald and fam-
ily. Mr. Scholz drove across in his auto
Saturday and with his family has been
visiting at the Scholz home on Santa
Clara road this week.

A new prospectus has just been issued
by Heald's San Jose Business College
and a copy will be sent free to all who
are interested. The big opportunities
today are in business. The door is open
to young men and young women alike.
Write Heald's San Jose Business Col-
lege.

Mr. G. M. Ellison, proprietor of the
Roofden Poultry Ranch south of town
has recently returned from an extended
trip East throughout the south up to Bos-
ton and back throughout Canada. He
said that he has requests for his products
from many of the middle and western
states.

Logan Benner and Mrs. Ingles of Santa
Cruz, were married at Trinity church,
San Jose, Saturday evening. Mr. Ben-
ner suddenly became very popular with
the young lads about town who treated
the newly wedded couple and the rest of
the townspeople to a genuine "Shiv-
eree," Monday evening.

The question has arisen as to the ne-
cessity of delegates to the county con-
vention as indicated by the sample ballot.
The duties of this convention are; to fill
vacancies on the party ticket; to draw up
county platform; to manage the party
campaign in the county and to attend to
any other matters that might arise from
time to time.

S. A. Gage, an employee of Sierra and
San Francisco Power Co. was appre-
hended at the office just as he was about
to draw his pay. The man had stolen a
suit of clothes from L. Hendershot and a
derby from the son at Campbell and was
dressed in the stolen clothes when
caught. He confessed to the act and re-
turned the property to the rightful own-
ers and after getting quite a scare was
let go as Mr. Hendershot did not wish to
make complaint.

New Proprietor

A. W. King of San Francisco has pur-
chased the Delicatessen and Ice Cream
Parlors of Jas. Kelley and will continue
the business. Mr. King is a candy-maker
by trade and expects later to make his
own candies. In that way Campbell has
added another industry and will have
fresh home-made goods at all times.

Mr. and Mrs. King have taken posses-
sion and will live in the building until
the "Kandy Kitchen" is begun. The
new counters are pleasant people to meet
and will doubtless receive a hearty sup-
port which will spell success for them.
Mr. King's ad. appears elsewhere in this
issue.

Automobile at the Fair

This city is to have the first automobile
fashion show of the season. The event
will cover ten days and will be held in a
splendidly decorated temporary building
over South Market St. in front of the
Auditorium Sept. 5-15. The auto show
will be a part of the Santa Clara County
Fair and Fourth National Pure Food and
Industrial Exposition and will bring out
over 100 cars in which a long list of
manufacturers and agents will show the
1913 models, including all of the latest
improvements.

It is said in automobile circles that the
new self-starters will be one of the
largest features of the show and experts
predict that more attention will be at-
tracted by these innovations and their
make-up than any other 1913 improve-
ment. It is pointed out that a score or
more cars are bringing out these conven-
iences this year, many of them newly
patented, and that naturally the automob-
ilists' attention will turn to them as ever
auto owner hates the all too frequent job
of cranking his engine.

Announcement

CHILDREN, PARENTS, TEACHERS

That Great Dry load of School Books,
School Supplies, Stationery, Etc., Etc.
just received by the Campbell Drug and
Stationery Store means that we are, as
usual prepared to supply all your needs—
at lowest prices; yes, and allow THREE
per cent rebate on all purchases. Tickets
too. "A word to the wise," etc.

Motorcycle at the Fair

SAN JOSE, August—Invitations have
been sent out to every motorcycle club
in the state, Sacramento, San Francisco,
Oakland, Fresno, Santa Cruz, Stockton,
Los Angeles, Marysville—and as far as
possible to every individual rider, bid-
ding them come to San Jose to the great
motorcycle festival on Sept. 9th. On
that day thousands of motorcyclists in
costume will participate in a parade in
which valuable prizes will be given the
best dressed tandem—man and woman—
and the best dressed individuals. The
Santa Clara County Fair management
will stage races at the San Jose Driving
Park and the San Jose motorcycle club
will play host, keeping open house at its
up-town clubrooms and checking each
rider's motorcycle in a large building
which is to be procured and turned over
to the visitors so that they may leave
their machines in safety.

It is estimated that motorcycles worth
three quarters of a million dollars will be
stored in the building and special guards
and many barrels of sand will be kept
about the building to guard against fire.

Over a thousand Indian riders will
come from their picnic of the day before
at Fernbrook Park in Niles Canyon in
costume to the affair and will help to
make the crowd the greatest motorcycle
gathering the west has ever seen. Char-
les D. Reade, president of the local club,
and Messrs. C. Zettle and R. Partlow
are in charge of the plans for entertain-
ing the visitors.

Schools Will Open Sept. 9th

The Campbell High School will open
September 9th with the following teach-
ers:—Mr. Irving W. Snow, Principal,
Latin and Physical Geography; Miss E.
B. Catton, German, History and Mathe-
matics; Miss Josephine Moulton, Eng-
lish; Miss Abbie Sykes, Commercial
Subjects, History and Mathematics; Mr.
D. H. Cramer, Physics, Chemistry, Bot-
any and Mathematics; Miss Winnie
Chamberlin, Drawing and Manual Train-
ing; Mr. M. L. Lawrence, Music.

The detailed course of study follows:

First Year:—
Required:—English, Algebra.

Elect Two:—Latin, German, An-
cient History, Bookkeeping, Physical
Geography, Typewriting, Freehand
Drawing, Music, Manual Training.

Second Year:—
Required:—English, Plane Geome-
try.

Elect two:—Latin, German, Medi-
aeval and Modern History, Botany,
Freehand Drawing, Advanced Drawing,
Bookkeeping, Typewriting, Stenogra-
phy, Music, Manual Training.

Third Year:—
Required:—The continuance of the
major subject with Chemistry ad-
ded if Physics is not to be taken
in the Fourth year.

Elect:—The remainder of the work
from Latin, German, English, Chemis-
try, Mechanical Drawing, Freehand
Drawing, Advanced Drawing, Book-
keeping, Typewriting, Stenography,
Advanced Algebra, Music, Manual
Training, English History.

Fourth Year:—
Required:—United States History
and Civics, Physics (if Chemistry
was not taken in the Third year),
completion of the major subject.

Elect:—The remainder of the work
from Latin, German, English, Mechani-
cal Drawing, Freehand Drawing, Ad-
vanced Drawing, Bookkeeping, Type-
writing, Stenography, Solid Geometry,
Trigonometry, Music, Manual Training.

Pupils are required to take four years'
work in some one of the departments of
English, Foreign Languages, (Latin and
German), History, Mathematics, Science
and Commercial Work.

Two years of German are offered, one
year of Manual Training, three years of
Drawing. Music is taken in addition to
the regular course.

Four full subjects constitute a year's
work and fifteen are required for gradu-
ation. All subjects are accredited at the
Universities and Normal Schools of the
State, except that the University of Cali-
fornia requires examination in Commer-
cial Subjects. For recommendation a
student must have attained a grade of
"C" or over in all subjects (85 per cent
and over). During the year 1912 to
1913, all the subjects in the course of
study will be offered except English
History and Solid Geometry and Trigo-
nometry. Only twenty students can be
accommodated in Manual Training and
so the preference will be given to the
upper classmen till the required number
is obtained.

Messrs. Miracle, Evans, Whitney and
McCarthy have returned from their hunt-
ing trip much pleased with their success.

J. D. Sawyer has accepted a position
with the Metropolitan Life Co. with
headquarters at San Jose.

TAKE PLACE OF MEAT

DELICIOUS VEGETABLE SOUPS
FOR THE HOT WEATHER.

Something of a Novelty is One Calling for Fresh Garden Peppers—Onion Soup Brought to Perfection in France.

An housekeeper whose family doesn't care very much for flesh food in summer can find any number of delicious vegetable soups to take the place of meat decoctions, and having once formed the habit of using them it is likely to be a lasting one.

The following soup, calling for fresh garden peppers, is a novelty: Mince three large peppers and three small onions together and stew them gently, till tender, in a little butter—about two tablespoonfuls—without browning. Then thicken to a paste with a generous tablespoonful of flour and gradually stir the mixture into a quart of boiling milk. Season with salt and pepper. Gradually add also, stirring well, the yolks of three eggs, and then remove from the fire immediately and serve very hot with croutons. Do not let it cool long or it may curdle. If one or two of the peppers are a bright red, instead of green, they will lend pretty tints to the soup.

For French onion soup, which returned travelers describe as food for the gods, fry four onions in two tablespoonfuls of butter or very nice soup fat. The latter is to be preferred because it is cheaper. When they are quite brown add a scant half cupful of flour, stirring all the time. When the flour is brown mix in carefully (a little at a time) about three pints of boiling water or stock. Season the whole with salt and pepper and put the soup near the back of the stove, where it will merely simmer for half an hour. Mash two potatoes and add enough warm milk to them to make a puree. Stir this puree into the soup and if too thick add a little fresh milk. Then strain and boil ten minutes. Serve very hot with croutons.

The following combination of rice and lettuce makes a delicious soup: Have ready the large leaves of three good-sized heads of lettuce. After draining, chop them up and put them in a saucepan with about a fifth of a pound of butter and cook for five minutes, stirring frequently. Stir the whole into two quarts of white stock. Season with a tablespoonful of salt, a teaspoonful of pepper, half a teaspoonful of grated nutmeg and a soup bouquet. Str in also four ounces of well-cleaned rice. Cover the kettle and let it cook for three-quarters of an hour. Then strain the soup through a fine sieve. Let the soup heat once again, but do not let it boil. Stir in a pint of sweet cream, and serve very hot, with croutons.

Chocolate Sponge Pudding.
Beat lightly two eggs, add one cupful of sugar and beat for three minutes more. Then add one cupful of flour, into which has been sifted one teaspoonful of baking powder. Stir well and add a half cupful of boiling water, season with one teaspoonful of vanilla extract, pour into a square pan and bake in a moderate oven. When cool cut in two inch squares and pour over a cream made as follows: Place in a double boiler one pint of milk, and when hot stir in half a cupful of sugar, into which has been mixed one tablespoonful of corn starch, a bar of unsweetened chocolate, grated fine, and a small lump of butter. Stir until smooth and pour over the squares of cake.

Boiled Cider Sauce.
Delicious for fruit pudding. Rub to a light cream, two cups of white sugar and three-fourths cup butter; beat into it gradually one-half teacup boiled cider. Just before serving set into a kettle of boiling water; heat it hot, but do not let it boil. Pour over pudding made as follows: One cup buttermilk; one-half cup sugar; one tablespoon lard (melted), flavor vanilla, one egg. Put in enough flour to make cake batter; one teacup baking powder sifted in flour. Put cherries or any fruit in teacups, three tablespoonful; fill cups to one-half full with batter. Put in steamer and steam one hour.

New Tea Table.
The latest thing in tea tables is one that can be used as a table or a tray. It has folding automatic legs and is in the shape of a tray 27 by 17 inches and 24 inches high when the legs are opened. Some of these combination table trays are of plain mahogany with brass handles, others are inlaid; still others are of satin wood, plain or inlaid, with plated or sterling silver rims. The table can be utilized for cards by means of a board covered with green cloth that fits into the tray.

Borax for Laundering Lace.
In laundering lace bows and so forth, try rinsing in a solution of borax which will give them just the required stiffness. Two heaping tablespoonfuls of borax in a quart of water is the proportion. This is also good for thin white waists. Better than starch.—"Home Department," National Magazine.

Lovely Moonlight Rose of White or Silver Gauze

THE last rose of summer to bloom in the millinery garden is the most beautiful of all. A dream of rose, a lovely ghost of all the bright colored beauties which have preceded her. This is the rose of white or silver gauze, made of the fabric folded over and wrapped about a rose center in the semblance of a full blown rose.

In the illustration a hat (which a French woman would be sure to call "ravishing") is shown trimmed with a wreath of gauze roses and delicate grasses. The hat is a fine dead-white chip faced with moire in pale silver gray. Besides the wreath of roses, a very full bow of white ribbon partially covers the crown, in the trimming. It is an adorable hat, beautiful in every detail. Nothing could be better for

midsummer, or any other season, providing the body of the hat is chosen of a material suited to the time of year in which it is to be worn.

Other roses branched into wreaths and bouquets, are made of lightweight ribbons in odd colors. Very high luster in the ribbons makes these ribbon roses unusually effective and attractive. They are used on mid-season hats of lace and embroidery and on the net and lace caps which are worn indoors and out.

Tiny tightly folded roses continue to grow in favor, worn like a bar pin at the throat, over small bows, and jabots. They are made of all the most popular of the summer colors, blue, pink, green, lavender, pale yellow and white.

JULIA BOTTOMLEY.

SMART SLEEVE FROM WORTH

Silk Marquessette Gown Has a Long, Tight Cuff of Black Satin.

Worth has sent out a very smart sleeve in a black silk marquessette gown. It is full from a low shoulder to within an inch of the elbow, made of the marquessette, and there is a long tight cuff of black satin that extends to the hand, which is touched at the top with a thick satin cord, and is finished at the wrist with two white crocheted buttons and a half-inch fall of black lace.

The bodice has two gathered scarfs of the marquessette starting from the shoulders, crossing the bust, and finished at an empire waist line in the back with a flat pump bow held in place by thick satin cords at the edges. A black satin girdle outlines the front of the blouse, and it runs into a narrow pointed panel for eight inches below the waist. This panel is part of the skirt.

PANIER AN EARLY FANCY

Cannot Be Said to Have Achieved Much Success Despite Its Parisian Origin and Backing.

Numberless are the "robes de style" just now being shown in all the big dressmaking houses, says the Paris correspondent of Dress, and various are the forms they take. Of course the panier dress is one of them, copied exactly from old documents. But one never knows whether early models will be a success until La Parisienne has pronounced her opinion of them. Thus it is pretty safe to predict, instead of the panier dress, a return or a partial return to the directoire style. The high directoire collar and fancy vest are already seen at fashionable assemblies, worn with the cutaway habit coat and wide cuffs of the period. The directoire hat is worn with this costume, but the directoire hat is not new to us, for we have had it with us all the winter.

Tinted Walls.
It is far cheaper to tint walls with water or "size colors" than it is to paint them with oils. Moreover, the colors are lovely and the finish soft. The only difficulty lies in the fact that tinted walls cannot be washed. Size or fresco colors should never be touched with water. They may be cleaned with bread crumbs, or Indian meal, but the process is a tedious one. Dry pigments are used for this tinting. They are generally mixed in glue size that has been dissolved in hot water. They cost about fifty-five cents a package and one package will cover about forty square yards.—Harper's Bazar.

Crash Motor Coats.
The newest coats for motoring are made of heavy plain colored crash, lined with flowered crash, and the trimming of grill work and fabric-covered buttons. The flower effects in the linings are bold and the coloring brilliant.

OF MOUSSELINE DE SOIE.

This model is of mousseline de soie but can be made of any other material. It is gathered or shirred at the shoulders and finished in front with a band of lace and buttons, on each side of which is a wide, graduated frill, bordered with heavy lace.

The collar is of fine lace, the cravat and girdle are of satin. The sleeves are finished with odd-turned back frills of the material, edged with the heavy lace.

Fancy Vests in Favor.

A number of the smartest suits now being made up show fancy vests, says the Dry Goods Economist. These are occasionally made separately, so that the suit can be worn with or without them, but the majority are attached to the coat, and it is expected that the latter style will be made popular that the separate vests. These vests are made of satin, broadcloth, velvet, moire, faille, brocade and other fancy silks. Some of the more elaborate are beautifully embroidered in the new Oriental colorings or in blending color to match the garment.

Lace and the Reticule.

Handbags made of lace are a pretty summer possession that will take the fancy of the lover of dainty dress accessories. They are swung from long cords and are to be worn with the lingerie frock. Irish and Venise, both real and imitation, compose them, as well as black and white Chantilly, and fillet combined with embroidery.

Waists Have Pockets.

Sporting waists for tennis, golf, etc., come in white or natural colors, butcher's linen, with big pockets, belts and collars and cuffs made of plain or striped material. There are, of course, the usual hip pockets and silk ties.

THEIR PERILOUS TRIP

TORIES SUFFERED HARSHIPS IN SEEKING NEW HOME.

Flight From New York Made Imperative After the Success of the Revolution, Gals Drove Them Into Danger.

After the revolution was over and the British had evacuated New York the victorious patriots made life a burden to the Tories. Even the children taunted and stoned them when they ventured on the streets. So a lot of them held a meeting and decided to seek some colony of the king's where they could live in peace. With this purpose in view, they bought a ship, put all their household goods on board and sailed away, 320 souls in all.

The captain's experience in navigation had been confined to coastwise trips as mate of a fishing schooner, and he lost his reckoning in a thick fog which they ran into a fortnight from New York. The fog lifted before a roaring gale which drove the vessel before it straight ahead into unknown latitudes.

The weather grew colder and colder, and the sea was dotted with flocks. Snow and sleet fell from the sunless sky, and the ship soon became sheathed in ice. Many died of the extreme cold and exposure and were buried in the sea. When the storm ceased there was no sign of land anywhere, nothing but the lonely ocean and the floating cakes of ice that bumped and battered the vessel on all sides with a noise like thunder. The half-frozen voyagers begged the captain to turn and head south as soon as possible, anywhere away from the terrible cold, so the ship retreated her course. Gradually the air grew warm, the ice melted from decks and rigging, and birds and flying fish appeared in great numbers.

At last they sighted a beautiful island with brown and white roofs clustered here and there among the tall palms and purple hills in the background. It was hailed with extravagant joy, for water was low, the food running short and their clothing in rags. As the storm-beaten ship approached a crowd of people in white, red and yellow garments gathered on the beach, but made such unmistakably hostile demonstrations they dared not land, as their only weapons were half a dozen muskets. So they turned the vessel once more, and sorrowfully steered due north again, finally reaching St. Johns, where they received a cordial welcome, and where their descendants are still living.

Studying Effect of Exercise.

A serious attempt to investigate what may be called the hygiene of sport is about to be made in Berlin. To carry out the objects in view a sport laboratory is to be established and placed under the charge of the Charlottenburg municipal authorities. The idea had its origin in a department of the hygiene exhibition held recently at Dresden, in which everything that could throw light on the influence of sports and gymnastic exercises on the human organism was brought together. Special attention was paid to bodily measurements arising under different conditions and from different muscular exercises, and particular observation was directed to the good and harmful effects of the several sports and gymnastics on the human body and its members. One of the chief objects of the new laboratory will be the observation of all that possibly affects school children in respect of food and physical exercises.

Money in Beaver Pelts.

According to the Ottawa Citizen, the recent sale of furs at the Parliament building realized \$5,354.05 for the province. The pelts were taken from animals trapped in Algonquin park, under the direction of the minister of lands, forests and mines.

There were 450 beaver skins, which were caught under special order, and realized \$4,090.50; 89 mink, 5 fisher, 11 marten, 71 muskrat, 12 otter and 8 ermine. In addition, 23 pounds of casoreum were sold. This is a secretion found in the beaver and is used in making perfumes and for medicinal purposes.

The revenues of Algonquin park have also been augmented during the past year by the sale of live beavers to several zoological societies. Animals have been shipped to New York, Philadelphia and London, England.

He Chose the Flat.

"You are charged with desertion," said the judge sternly. "Judge," answered the prisoner at the bar, "I will explain. Our flat is so small that my wife and I can't live in it comfortably at the same time. Being naturally tender hearted and considerate of her welfare, I stay on the outside and let her stay on the inside."

The judge ruminated. "Ingenious but not convincing. Take your choice between going back to live with your wife in the narrow confines of your flat and spending six months in our workhouse, where there is plenty of room."—Birmingham Age-Herald.

Awful Fix.

"Peggy's in a terrible fix." "What's the trouble?" "She's just counted up and found she's refused a dozen offers of marriage, and now though she's crazy to marry Dick she's afraid to accept him because he's the thirteenth."

MUCH DAMAGE DONE TO CORN BY BORING OF CATERPILLAR

Any Method Which Will Insure Complete Destruction of Over-Wintering Larvae, if Persisted in, Will Effectually Preclude Serious Injury From This Little Insect.

(By GEORGE G. AINSLEE.)

In many cornfields, especially in the South, a heavy wind late in the season, before the corn is matured, does great damage by breaking the plants off at the surface of the ground, thus ruining them.

An examination of these broken stems will in most cases show that they have been greatly weakened by the burrows of a caterpillar known as "the larger corn stalk borer."

Its work is largely within the stem of the plant, and is so concealed that in most cases, unless weather conditions make it conspicuous, the presence of the insect passes unnoticed.

This insect seems to have been originally an enemy of sugar cane and to have first transferred its attention to corn in the southern part of this country, where corn and cane are grown over the same territory. It occurs in many countries where sugar cane is the staple crop, and has caused great damage in the West Indies, British Guiana, Australia, and Java. The bulk of the evidence goes to show that it was first brought into this country with the importation of sugar-cane cuttings from the West Indies and Central and South America, where, since early times, it has

a. Female moth; b. Wings of male; c. Pupa.

plugs the burrow below with digested pith, and in the chamber thus created slowly changes to the next or pupal stage.

Seldom is the stalk damaged above the third joint from the ground, although the larvae, when small, are found in the large midribs of the lower leaves and later in the season, when the food supply is restricted, even in succulent bobbins farther up. They sometimes also penetrate the underground part of the stalk in feeding and enter some of the larger brace roots for a short distance.

The larvae of the second generation work in a similar manner, except that at the time they appear the tassel has been formed; hence the damage is now confined altogether to the lower stalk. Thus, instead of arranging to pass the pupal stage in the upper stalk, they penetrate to the root to hibernate and there, as larvae, pass the winter in a quiescent state.

Rotation is one of the best general preventives of injury from insects affecting field crops. Experience has shown that where corn has followed itself upon the same field for two or more years there has been a much

Mutilation of leaves of corn caused by larvae of larger cornstalk borer.

greater loss from the borer than where an annual change of crop has been practiced. This is especially noticeable where stalks or stubble from the previous year have been allowed to remain undisturbed throughout the winter. The moths, upon emergence in the spring, finding themselves surrounded by the young corn, commence egg laying at once and escape the dangers encountered in searching for another field of young corn results in many of the females being eaten by birds or being destroyed because of rain, cold, or failure to find the object of their quest. A few moths will always succeed in their search, but the successful proportion will be greatly decreased by persistent crop rotation.

EXCELLENT FEED FOR LIVE STOCK

Alfalfa Is Rich in Flesh Forming and Milk Producing Nutrients—Right Kind of Soil.

(By A. T. WIANCKO, Indiana Experiment Station.)

For alfalfa: Good drainage must be provided. The ground must be free of weed seed.

Soil lacking in fertility must be well manured, as alfalfa requires a large amount of plant food.

Inoculation of the soil will generally be necessary and must not be neglected. Soil from a good alfalfa field or from a place where sweet clover is growing should be used for inoculating.

Alfalfa is an excellent feed for all kinds of stock.

It is rich in flesh forming and milk producing nutrients.

It is more digestible than red clover and is not far behind such materials as wheat bran in feeding value.

Alfalfa will yield from three to six tons of hay per acre per season, according to the fertility of the soil.

Larger cornstalk borer; Larva in lower part of corn plant preparatory to hibernation.

ter or dew usually standing there will allow it to go, and begins to feed on the leaves, going back and forth through the yet unfolded clusters and soon riddling the more tender leaves with aimless burrows. If the burrow reaches the tender terminal bud where the future joints are being formed, further growth at that point ceases and the plant becomes stunted and misshapen, with no tassel. As the plant continues to mature, the larva "grows out," as the farmers say. It is more likely that it is the evidences of its work and not the larva itself that "grows out," but for whatever reason, the caterpillar soon leaves the more leafy portion of the plant and attacks the stalk at or near the ground. Here a hole is cut through the bark of the stalk

Want Long Hair?

And you would like long hair? Rich, heavy hair? Beautiful, luxuriant hair? That is perfectly natural, and we are here to help you. Ayer's Hair Vigor is a great aid to nature in producing just the kind of hair you desire. Do not be afraid to use it. No danger of its coloring your hair. The ingredients are all given on each label, thus enabling your doctor to wisely advise you concerning its use. Consult him freely. He knows.

Made by the J. C. AYER CO., Lowell, Mass.

Australia Would Save Birds.

Strong protest is being made in South Australia against the continual slaughter of such rare birds as the ibis, the egret, cranes and spoonbills to supply the demands of milliners. The slaughter renders South Australia even more prone to plagues of grasshoppers, and is a prime cause of the decline of its fish resources. As the wading birds disappear the crustaceans that destroy fish spawn increase in multitude.

CLOSING OUT

500,000 rolls of fine wall paper at 34c per roll and up. Interior and exterior house paint, \$1.25 per gallon. Barn and roof paint, \$1.00 per gallon. Write for free samples of wall paper and colored card of paints. J. L. ASH, 39 Sixth street, San Francisco.

Makes Unique Home.

In Zarzato, Spain, a case has occurred which is probably unique of its kind. A child has just been born while his father, grandfather, great-grandfather and great-great-grandfather are all living. His name is Urticococha, and the family are Basque farm laborers. The great-grandfather and the great-great-grandfather have acted as godfathers to the latest arrival. The united family constitutes nearly a whole village.

EVERY WOMAN WILL BE INTERESTED.

There has recently been discovered an aromatic pleasant herb cure for woman's ills, called Mother Gray's AROMATIC LEAF. It is the only certain regulator. Cures female Weakness and Backache, Kidney, Bladder and Urinary troubles. At all drug stores or by mail 50c. Sample FREE. Address the Mother Gray Co., Le Roy, N. Y.

London Fogs Costly.

It is said the London taxpayer is put to an extra expense of \$600,000 annually by reason of the prevalence of fog. One gas company alone furnishes gas to the value of \$15,000 over and above the normal figure on a single day of fog. The suspension of traffic is another serious item.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

His Habits Unchanged.

"The conditions seem to be unfavorable," admitted the trance medium. "I am unable to get any communication from your late husband." "Well, I'm not at all surprised," replied the widow. "It's only nine o'clock now, and John never did show up till about two a. m."

Beat of the Pulse.

The average pulse of a healthy man beats seventy-two times a minute.

Independence First.

Let your first effort be not for wealth, but independence. Whatever be your talents, whatever your prospects, never be tempted to speculate away, on the chance of a palace, that which you need as a provision against the workhouse.—Lord Lytton.

WHERE TO STOP AND SHOP

in San Francisco and Oakland

REAL ESTATE

FOR SALE—A. A. ALL CULT. NEAR TULARE. Cal. 60 house, bath, barn, outbuildings, sheds, orchard, stock, machinery, etc. 20 A. in alfalfa, will sacrifice. Address Elise, Box 320, Chicago, Ill.

STOCK, GRAIN, FRUIT RANCHES FOR SALE AND EXCHANGE. Write C. D. Ashbaugh, Paso Robles, Calif.

DEATH SEEMED CLOSE

MAN LIVED YEARS IN FEW AGONIZING MINUTES.

And After All the Cause of the Trouble Was Not a Rattlesnake, Though That Seemed the Only Explanation.

"Oh, dear," said Dorothy, suddenly, looking up from her newspaper, "there's a snake loose."

"In Upper Footing?" I said. "Impossible. This is a respectable residential suburb."

"But there is," she persisted. "It has escaped the naturalist's shop at the corner. This late edition says so. Whatever shall we do? Suppose it gets into our bathroom?"

"We shall hear the water running if it attempts to have a bath." I reassured her. "Then we can go up and sneak the soap. How big is it?"

"Small—but very deadly."

"After all, perhaps it's all for the best," I mused. "It may be the means of reforming some heavy drinker before he has gone too far." And then, as if to show how closely comedy and tragedy can be allied, it happened.

It was cold and clammy, and I felt it run rapidly down my leg. Beads of perspiration stood upon my brow, and a convulsive shudder ran through me.

"Someone walking over your grave?" asked Dorothy, who can always be relied upon to make the proverbial remark; but she won no answering smile from me. This was no time for mirth, with death staring me in the face—or, to be correct, in the right trouser leg.

"Quiet," I whispered. "Something cold has just run down my leg. It must be the snake."

"Oh, dear," she shrieked. "And now you'll die of hydrophobia."

"Not if we're calm," I replied. "Do as I tell you as quietly as possible. Perhaps it won't bite if it's not disturbed."

Then I bade her come to me and gently unlaced my right boot. Once more I felt that cold wriggle as I extended my foot, and we waited quietly for five agonizing minutes. I got pins and needles so badly that I feared they would prick the reptile and irritate it, but I dare not move. At the end of the five minutes I changed our tactics and handed her my penknife.

"Cut the lace," I recommended—"gentle. Don't cut me. If once he smells blood I am done for."

Then I bade her remove the boot. But, softly as she did it, once again there came the clammy wriggle, and now the thing was at my foot. With its arrival at the toe further progress would be baffled by the sock, and, thus baffled, it would probably strike.

The time for caution had gone by. Swiftly I stooped and grabbed at the spot, praying fervently that I might clutch its neck and so prevent its biting. And as I snatched there came a musical chink.

"It's a rattlesnake," screamed Dorothy. "Oh, do be careful!"

"On the contrary, my dear," I replied, "it is some cents that have slipped down my leg through a hole in the trousers pocket. I am saved."

I poured out a whisky and soda with trembling hands, while on the hearth rug Dorothy sobbed hysterically over my merciful deliverance.

Yellow Writing Paper Easy on Eyes.

Oculists have often called attention to the fact that the eyes are easily fatigued by the reflection from white paper, especially when the surface is under a strong light. Since green is known to be the color most restful to the eyes, it is a common practice to use wall papers and draperies of that color in libraries and private studies. For writing paper, however, green is an unsatisfactory color. It imparts a reddish appearance to the writing and makes it hard to read.

Yellow writing paper is not open to the same objection. In strong daylight it is softer than pure white paper, and in artificial light is not too dark. Black letters on a yellowish background show clear and distinct. Many mathematicians use yellow paper in figuring long and difficult calculations, and many writers have adopted it for manuscripts. It has the additional merit of cheapness.—Youth's Companion.

Those Pleasant Questions.

Dubbleigh's car lay flat on its side and deep in the mud in the freshly plowed field, having skidded off the road, through the low stone wall, to get there.

"Ah!" cried a passer-by from the roadside. "Had an accident?"

Dubbleigh tried to hold his tongue, but the strain was too much for him.

"No, of course not," he replied, coldly. "I've just bought a new car, and have brought my old one out here to bury it. Got a pick-ax and a shovel in your pocket you could lend me? I can't seem to dig very deep with my motor-horn."—Harper's Weekly.

Mother Was Puzzled.

A man who has an office downtown called his wife by telephone the other morning, and during the conversation asked what the baby was doing.

"She is crying her eyes out," replied the mother.

"What about?"

"I don't know whether it is because she has eaten too many strawberries or because she wants more," replied the discouraged mother.—Indianapolis News.

Men in the Engine Room

STARBOARD ENGINE OF A MODERN LINER

FREIGHT on a sailing ship from New York to London used to be 14 shillings a quarter of wheat; now it is just over a shilling a quarter by steamer from New York to Liverpool.

Not all of the engineering which has brought about this result has been done in the drawing office and the factory. Much of it has been done by workmen who took the raw inventions out to sea, struggled with their crudities and put the needed improvements into the minds of the designers ashore. In big ships and little the process is going on and it is a stern one still in spite of modern refinements. In the old days, when boiler pressures were so low that a steamer had to slow down to raise enough steam to whistle with, an unholstered settee was often provided in the engine room for the use of the man on watch, so that he need not stand more than was absolutely necessary. Today it is probable that not one seagoing vessel could show such a thing. A man who cannot walk about for four hours in the temperature of a Turkish bath is not wanted now.

While the ship is at sea all the engineers except the chief keep two watches of four hours each in the twenty-four. The same man always takes the 12 to 4 a. m. and p. m. watch, the second takes the 4 to 8 and the chief's watch, 8 to 12, is taken by the fourth engineer, or by the donkeyman, if there are only three engineers carried. In this case the chief is always within call. The duties of watch-keeping largely lie in seeing that this or that does not happen. As well as the main engines there are the pumps and other auxiliary machinery and the boilers always seeking to go wrong if given a chance. Then in port all hands are busy with the adjustments that have been noted down as necessary while the ship was steaming, and these entail the handling of tremendous weights with hand tackle only. Such work does not seem very formidable, perhaps, but seagoing engineers know that Commander Willett, U. S. N., spoke truly of their work when he told the American Institute of Naval Engineers that "it requires the most strenuous and exacting attention of any known pursuit, and, while requiring skill and intelligence to accomplish well, it has to be performed under such severe stresses and in such dirt and heat as to rob it of all interest except in its speedy completion."

In the Silent Hours.

An engineer does not readily forget his first voyage or that first night in the "graveyard" watch (12 to 4 a. m.) when he sat on a bucket to consider the novelty of his surroundings and reviled the heat, and woke up from a few seconds of troubled sleep to find the chief engineer vigorously kicking the bucket away from under him. In a few weeks he becomes ashamed of wanting to sit, even in the tropics; but he has not conquered human weakness even then, for after a few voyages nature will have provided him with the trick of sleeping while he solemnly paces the engine room. Usually this only happens after a spell of exhausting labor, such as is consequent on breakdowns, and usually it only lasts until he walks into the boiler-room bulkhead and wakes, feeling foolish and uncanny, after, perhaps, fifteen seconds of jerky somnambulation. Then he learns to keep a bucket of cold water handy to dip his head into, and the same intelligence that contrives this antidote warns him that it were unwise to mention the circumstance in the messroom. Indeed, a hint of even feeling sleepy is as horrifying to the ear as the smell of a heated bearing is to the nostril. A hot bearing once smelt is never forgotten. It is not by any means an overpowering smell—just burning oil—but to the man on whose watch it occurs it reeks of certain disgrace. When he has eased the engines and hears the other engineers warned by the change of speed, coming tumbling

down the ladders, while he is frantically searching for the source of the smell he would give five years of his life to undo the oversight of the last five minutes.

Discipline in the merchant service begins well enough at the top, but it does not work all the way down. It stops at the lowest grade of man who has a certificate to lose, the junior engineer. In the evidence at a recent nautical inquiry one read of a man smilingly informing the court that he was ashore having a last drink while he should have been on board joining in boat drill. A junior officer or engineer dare not do such a thing. The law and the owners deal severely with him. He is supposed to behave with naval obedience himself, while his own authority is frequently flouted by those nominally at his command. Anything less like the navy could scarcely be imagined. The idea that engineers are given to chastising firemen with any handy weapon is often found in fiction. It is fiction. In real life discipline below decks depends almost entirely on the good nature of the firemen.

Surroundings Are Degrading.

Socially the merchant service engineer is equally remote from the naval type. His accommodation does not often rise above the level set by oil-clothed tables and kitchen cutlery. Such conditions have not an expanding effect on the intellect. His conversation in the messroom is commonly personal and bitter. If he comes from the "upper middle classes" his relatives too often find him morose at 40, or vulgarized, or disappeared altogether from their ken. If he resists the social influence of his environment the result is often a curious mental combativeness which seems to arise out of the well nigh incompatible requirements that he is supposed to meet—an artisan with supposedly the prestige of a lieutenant and actually less authority than a corporal. The better educated men strive to rise above seafaring. Examinations must be passed and they can only be entered for by men with a certain amount of sea service to their credit. Twelve months at least must be passed at sea to enable a man to go up for a second class certificate of competency—that is to say, the certificate which legally qualifies him to act as a second engineer or on a very small ship as chief engineer. After obtaining that he must serve another year as engineer in regular charge of a watch on board an ocean going steamship before he may sit for his first class certificate, which enables him to sign on as chief engineer of any sort of vessel, from an excursion steamer to the last thing in Atlantic flyers.

When he is "up for second" he has to pick out the answers to questions about, say, the temperature of the hot well under imaginary and distressing conditions dear to the hearts of examiners, from mixed memories of raucous laughing nights ashore and of days of anxious vigilance over racing engines, when the propeller would be flung clear of the wintry western ocean and the ship quiver as though from earthquake. When he is "up for chief" he is set more difficult questions, but still not beyond the reach of simple arithmetic. If he aspires to the honorary examinations—"extra chief" it is called—the questions become more academic, and he unlocks the brain cell which contains the integral calculus. The calculus is probably stored next to visitors of the most important objects which it is to achieve for him—a surveyorship or superintendence ashore, a nice little home in Forest Gate or North Shields, and wifely companionship unbroken by voyaging, or perhaps the protection of a widowed mother.

Undesired Superlative.

He—if you only consent to marry me you would help to make me a better man.

She—I can't do that; but I'd be willing to help make you a better man.

YOUNG MAN BREATHED AGAIN

Tactful Candidate Surely Proved Himself Resourceful in an Emergency.

In the midst of his campaign for congress Stephen G. Porter of Pittsburgh, went to a big town hall, says the Washington correspondent of the Cleveland Plain Dealer. Before the affair was over he was called on for an impromptu exhibition of quick-wittedness that stamped him as a real major league tactician.

A young man whom he knew only slightly walked up to Porter and said: "Mr. Porter, let me introduce you to my wife."

But the moment the man had made the proposition he seemed to think of something, began to look pale, and became as ill at ease as a bigamist.

While Porter was shaking hands with the wife, the man was standing behind her making frantic signs that Porter could not interpret, but he knew he must be tactful and non-committal.

"So you're the Mr. Porter that's running for congress, are you?" inquired the young woman.

"Yes," admitted Porter.

"And don't you find it exceedingly trying having to be up all night so often?"

"Up at night? Oh, y-e-e-h, yes! Indeed it is. Should say so. You have no idea how trying it is," replied Porter, with diplomacy, but wondering where she got her up-all-night notion.

The young husband was still making queer signs, though he looked somewhat relieved.

"And what does your wife think about your being out all night three or four times a week?" the woman pursued.

"Madam," replied Porter, solemnly, "a woman who has the confidence in her husband that a woman should have doesn't think anything at all when her husband is out all night."

And the young man looked as if he earnestly desired to shout.

It seemed that the man had been telling at home how he was helping Porter in his campaign.

The Lovable Girl.

She manages to avoid all ill-natured gossip without appearing to reprove the gossipers or being in the least degree priggish herself. She has a positive genius for discovering agreeable traits in the most unlikeable people. Tell her that a certain young man is lazy, and will never amount to much in this world, and she will almost surely tell you that this same man is an invalid.

All her young friends may laugh and ridicule the manner in which Miss Fleming (who has more years than charms to her credit) dresses her hair, striving to look young again, and this girl whom everyone likes will smile and ask her chattering companions if they remember that it was Miss Fleming who organized their own beloved "book club," loaning them her rare volumes and helping with her kindly efforts to make the club a real success.

She is frank in her likes, this girl, but cautious in expressing dislikes of other people or things. Her friendship gives more than it expects, and her love will be pure and true. Happy by nature, she sends into the lives of her companions a good cheer, and fortunate indeed is the young man who wins for himself her love.—Exchange.

Scottish Dish.

The huckleberry, or whortleberry or bilberry, has always been well known. The Scots eat them with milk, as we do, but they also make a jelly out of them, which is flavored with whisky.

Cranberries can be found all over the world where there is marshy land, but those of the United States are considered the best and are exported in great numbers to Europe.

The mulberry was cultivated by the ancients and has played a more important part in literature than any other berry. It is mentioned several times in the Bible, while Ovid speaks of it in his famous tale of "Pyramus and Thisbe."

The mulberry was brought from Persia and the Romans much preferred it to any other fruit. It did not reach England until 1548, and the trees planted at Slon House during the same year are still alive. James I. of England was exceedingly fond of the berry and caused large quantities of the bushes to be planted in all the grounds of the royal palaces.

"Color Hearing."

Some persons associate particular colors with particular sounds. In a recent presentation of this subject to the French Academy of Sciences it was pointed out that there are two forms of this phenomenon.

In one case the person has a sensation as if a transparent colored film, like a rainbow, appeared before his eyes when certain vowel or musical sounds strike his ears. In the other case letters or written words, representing the sounds heard, appear in colored tints. The tints are very definite and characteristic and do not vary with lapse of time, but two persons seldom associate the same colors with the same sounds.

Inspiration.

Visitor—That line in your poem. "Like the scent of the hyacinth," must have been inspired. Were you in a garden of beautiful flowers when you wrote it?

Poet—No; I was sitting in the kitchen while my wife was peeling an onion.

MOTHER OF LARGE FAMILY

Tells How She Keeps Her Health—Happiness For Those Who Take Her Advice.

Scottville, Mich.—"I want to tell you how much good Lydia E. Pinkham's Vegetable Compound and Sanative Wash have done me. I live on a farm and have worked very hard. I am forty-five years old, and am the mother of thirteen children. Many people think it strange that I am not broken down with hard work and the care of my family, but I tell them of my good friend, Lydia E. Pinkham's Vegetable Compound, and that there will be no backache and bearing down pains for them, if they will take it as I have. I am scarcely ever without it in the house."

"I will say also that I think there is no better medicine to be found for young girls. My eldest daughter has taken Lydia E. Pinkham's Vegetable Compound for painful periods and irregularity, and it has helped her."

"I am always ready and willing to speak a good word for Lydia E. Pinkham's Vegetable Compound. I tell every one I meet that I owe my health and happiness to your wonderful medicine."

—Mrs. J. G. JOHNSON, Scottville, Mich., R.F.D. 3.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and today holds the record of being the most successful remedy for woman's ills known.

Only Person "Touched."

Duels in France are often more costly than dangerous. The very lowest figure for which an encounter can be brought off is \$4, and to do the thing in style considerably more must be spent. Aurelian Scholl, the boulevard journalist, once suffered. A friend of his sent a challenge and borrowed 100 francs off Scholl for his expenses. This sum he never repaid. "The duel was a bloodless one," relates Scholl. "I was the only person 'touched.'"—London Chronicle.

Oriental Politeness.

In China when a subscriber rings up the exchange, the operator may be expected to ask: "What number does the honorable son of the moon and stars desire?" "Hohl, two-three." Silence. Then the exchange resumes: "Will the honorable person graciously forgive the inadequacy of the insignificant service, and permit this humble slave of the wire to inform him that the never-to-be-sufficiently-censured-tue is busy?"

Gem Worth Remembering.

With malice toward none; with charity for all; with firmness in the right, as God gives us to see the right, let us strive on to finish the work we are in; to bind up the Nation's wound; to care for him who shall have borne the battle and for his widow and orphan—to do all which may achieve and cherish a just and lasting peace among ourselves and with all nations.—Abraham Lincoln.

Have Ever Some Occupation.

"But women—be they of what earthly rank they may, however gifted with intellect or genius, or endowed with awful beauty—have always some little handiwork ready to fill the tiny gap of every vacant moment."—Hawthorne, in "The Marble Faun."

Unprofitable Pets.

It is said that a hundred thousand canaries are kept in Paris apartments and that it costs \$2,000 a day to supply them with chickweed alone. They also consume large quantities of lettuce, hemp and other seeds.

Daily Glimpse of Manhattan.

Numerous elderly, prosperous-looking business men were distinguished in the wriggling throng that filled the floor most of the time, and at daybreak the negro musicians were still playing.—New York Sun.

Heater for Drinking Water.

For the use of dentists and barbers there has been invented a metal holder for tumblers, with which water may be heated by electricity to any desired temperature.

Laughable Reduction.

A statement was made in the house of parliament in 1610 that the coal mines of Newcastle would be productive for at least twenty-one years.

MEXICAN MUSTANG LINIMENT

FOR SPRAINS.

C. M. Northrop, Bisbee, Ariz., writes: "I have been using Mexican Mustang Liniment for a sprained foot with great result. It is an awful fine remedy for such ailments. It penetrates quickly, removes all inflammation and reduces the swelling. 25c. 50c. \$1 a bottle at Drug & Gen'l Stores."

STOCKHOLDERS' MEETING
A special meeting of the Stockholders of the
Bean Spray Pump Co. is hereby called for Tuesday
afternoon, September 24th, 1912 at 2 o'clock, in the
office of the Corporation at 217 West Julian Street,
San Jose, California, for the purpose of voting on
the proposition of increasing the Capital Stock to
Two Hundred and Fifty Thousand Dollars (\$250,-
000.00), and for acting on such other business as
may properly come before said meeting.
J. D. CRUMMEY, Secretary.

Candidate for Republican Nomination for
State Senator
27th Senatorial District
Election, September 3rd, 1912.

COUNTRY boys are coming into their own, and their superiority is being admitted and vouched for in ways that cannot be denied or controverted. The United States Civil Service Commissioners want 1000 young men to qualify for positions as clerks and carriers at the Chicago postoffice, and their experience is, in previous examinations, that two-thirds of the graduates of the Chicago Grammar school failed in the simple examination, while the graduates of schools in obscure communities passed without difficulty. The country boy has few distractions and he may pursue his studies without interruption. With him his lessons are the chief events in his life, and he learns them well. The city boy passes a few restless hours in the schoolroom, and as soon as he leaves he is out occupying his mind with various forms of amusement, and some of these amusements are not entirely moral or uplifting. The newspapers are sounding the "back-to-the-farm" cry, while the cities and great commercial enterprises are calling for country young men to come and manage them.—Minneapolis News.

THERE is a lesson to be learned from the Oakland recall election which the people cannot afford to let go by unheeded. Here a handful of citizens who were displeased with the administration, by the circulation of charges reflecting upon the officials and by public denunciation of their official acts, gathered around them a sufficient following to meet the requirements of the law making the submission of the recall imperative upon the part of the powers accused. The result was just as was expected, the law-abiding, respectable element of the community rallying to the defense of their officials and out-voting the disturbers by nearly two to one. But the point that should not be lost sight of is the fact that under the present laws a mere handful of designing or disgruntled voters can put in motion the machinery which automatically will impose a burden of election on the great mass of people wholly contented with the conditions under which they live.—Stockton Independent.

THE estimated registration for the November election is 1,007,800 voters—men and women. In point of numbers Santa Clara county comes 4th in the list of 58 counties, Los Angeles leading, with San Francisco second, Alameda third, while Alpine tails the list, having but 150. The cost of printing the several amendments to be voted on will be approximately \$30,000. There will be ten amendments, two of which were submitted by the legislature, and eight up by initiative by the people. The two are on free text books, and irrigation bonds. The eight initiatives are, creation of a produce exchange, abolishing poll tax, abolishing the death penalty, permitting home rule (single tax,) anti-prize-fighting, week-day rest, permitting gambling on races, and city consolidation.

THAT California is teeming with prosperity and that its bounteous yields from its vast acreage planted to the diversified crops for which the state is noted have circulated millions up to date with as much more to be won from the soil during the remainder of the growing and harvesting season, is shown in a report just made by Secretary of State, Frank C. Jordan. Wonderful is the showing made by the 7,500,000 acres of arable land in the San Joaquin valley, and special tribute is paid to the 125,000 acres planted to barley in San Joaquin county which last season netted millions to the county and promises even greater returns this year.—Stockton Independent.

**L. D. BOHNETT
OUT FOR ASSEMBLYMAN**

As the primary campaign advances it becomes more and more evident that the voters of the 44th Assembly district appreciate the work of a faithful legislator and that they will renominate L. D. Bohnett for the Assembly on September 3rd. Seldom, if ever, before has Santa Clara County been represented in the state legislature by a man who has had so much influence in that body as Mr. Bohnett has had during the last two sessions; and it may be said to his credit that his influence has always been exercised in the interest of good government and better conditions for the people of the state.

During the session of 1909 Mr. Bohnett was one of the leaders of the minority that fought the organization then in full control of the political machinery of the state. During the session of 1911 he retained his position of leadership among the progressive members, who were now in a majority, and had a very prominent part in enacting into law the progressive measures which have made the last session of the California legislature famous throughout the nation. If re-elected he will be a candidate for Speaker of the Assembly and those who are familiar with the situation predict that he will be the next Speaker.

ing, it may be said that during the recent constitutional amendment campaign Mr. Bohnett spoke at nearly every meeting held in this county, advocating the suffrage amendment at each meeting.

Among other measures Mr. Bohnett expects to introduce at the next session will be a bill to prevent the sale of worthless stocks in the state, taking as his model the famous "blue sky law" of Kansas. Hundreds of thousands of dollars have been saved to the people of Kansas by this law, and the same will be true in California.

Mr. Bohnett has stood pledged to the support of the movement to get a state farm and agricultural school established in this county from the beginning of that movement. Such projects as this, the securing of an appropriation for Port San Jose and the building of a state highway into the Big Basin from Saratoga summit have his unqualified support, as they have the support of all loyal citizens. The friends of Mr. Bohnett point out in this regard that a man with his experience and prestige in the Assembly will have a great deal more influence in getting such measures through the legislature than any inexperienced man can have.

Mr. Bohnett was born in Santa Clara County and has lived here all his life. He is a graduate of the Campbell Union High School and was graduated from the University of California in 1906 with high honors. Early in 1908 he opened law offices in San Jose and since that time has been actively engaged in the practice of his profession.

U. of C. Sport

The football season has begun. The first game is to be played by the freshman fifteen, on August 30. The annual Rugby game with Stanford will be played at the University of California on Saturday, November 9. On Thanksgiving Day there will be a game at Los Angeles with the University of Southern California.

Four international football contests are announced also. An All-Australian team, made up of the best players of the Commonwealth, will cross the Pacific in October, to return the visit made to Australia by the combined California-Stanford team two years ago. The Antipodeans will play the University of California Rugby team three times—on October 26 and 30 and on November 2. Another international game will be with Vancouver, October 16, and the blue and gold fifteen will meet, also, the teams of the University of Nevada, the Olympic Club and the Barbarian Club of San Francisco, the Sacramento Athletic Club, etc.

Deafness Cannot be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.
We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.
